

# Rapid Control Prototyping (RCP)

Processes for Modern Control Engineering

**SCHMALKALDEN  
UNIVERSITY**  
OF APPLIED SCIENCES

Professor Dr.-Ing. Frank Schrödel

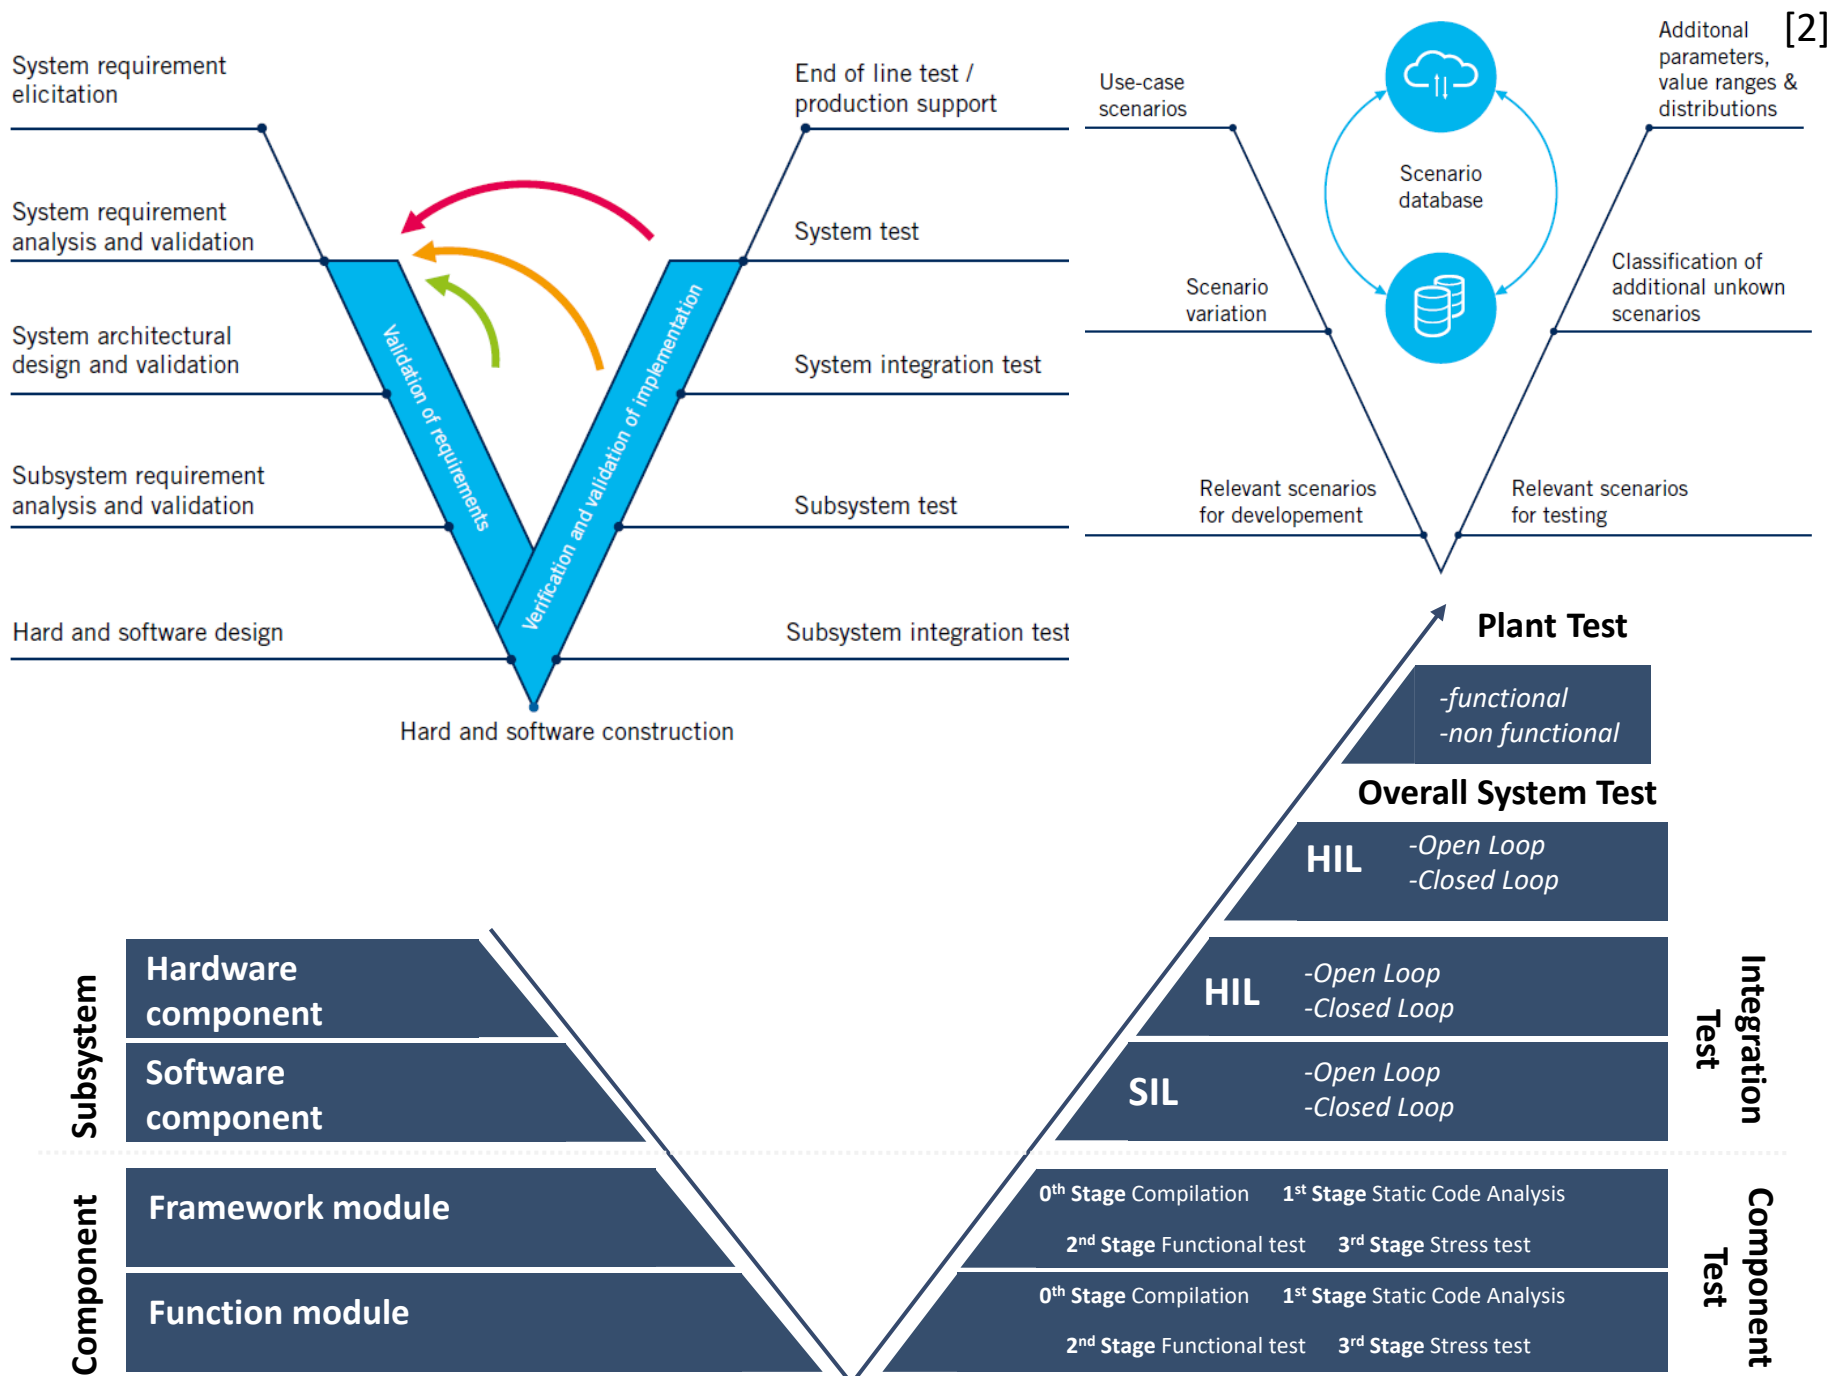

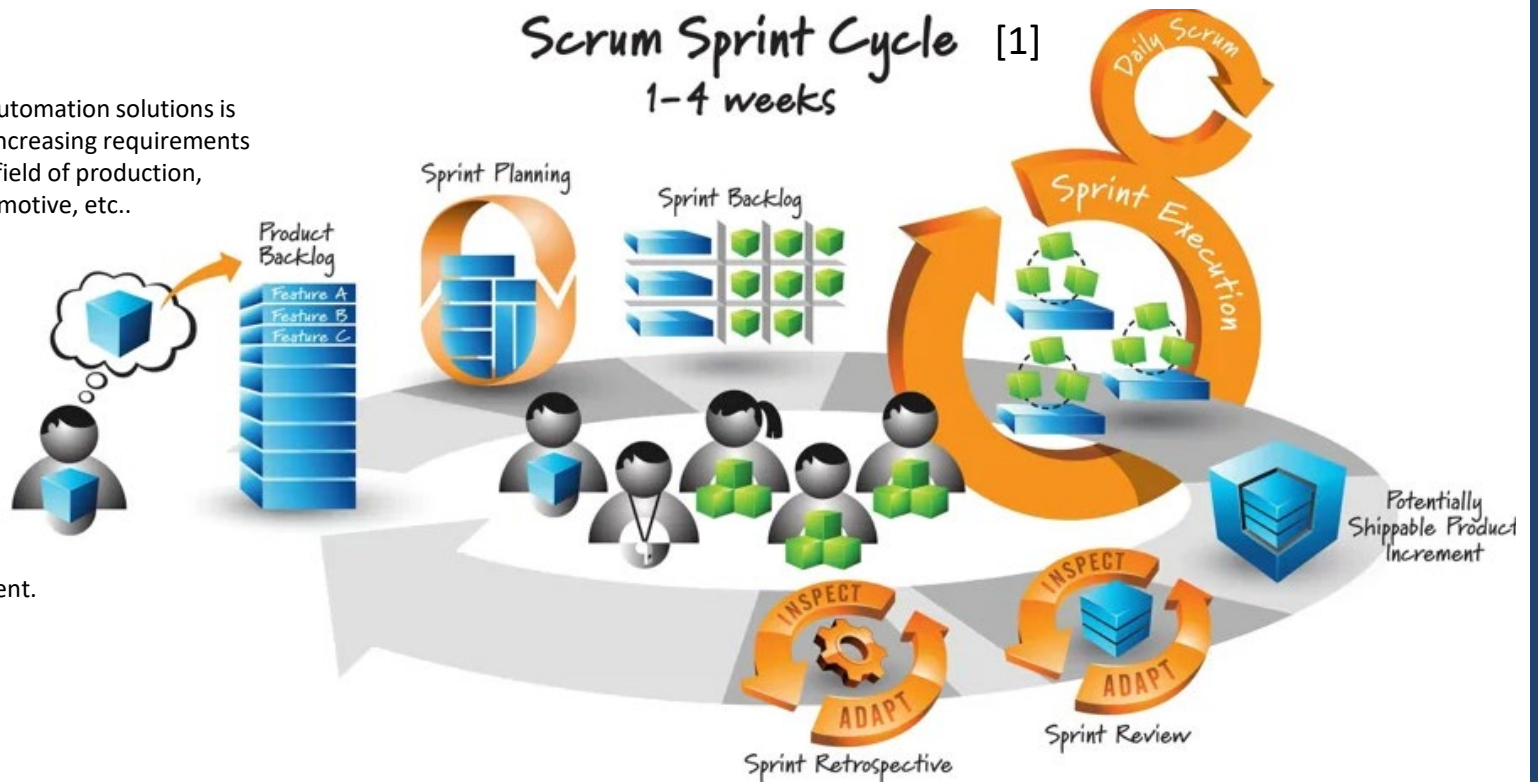

Fakultät Maschinenbau

Professor für Automatisierungstechnik & Robotik

The complexity of modern automation solutions is growing constantly, due to increasing requirements for technical systems in the field of production, health care, pharmacy, automotive, etc..

Therefore, processes for automation function development must be designed, introduced and established.

It is desirable to combine classic processes from engineering sciences with processes from modern software development.
